W-TRAP

W-trap, the effective wasp trap

Wasps are a common problem in the summer and autumn. Towards the end of summer- and in autumn - they become increasingly more aggressive and there is growing chance of being stung.

To stop this nuisance from wasps, Alcochem has developed a multi-functional wasp trap unit, the so-called W-trap.

The model consists of a cup holder, with conical openings placed along the sides. These will allow easy access for wasps, but avoid that entered wasps can exit the trap.

A screw lid is placed on the top of the wasp trap which can be used to open up the wasp trap and empty it regularly. The colour and materials of the W-trap are chosen to combine a good performance with durability. The wasp trap is suited for outdoor use.

Inside the wasp trap a wasp fluid has to be placed.^(*) We strongly recommend to use the Alcochem wasp trap fluid, which is optimized for effective and fast wasp trapping. Not only does the scent lure wasps swiftly into the W-trap, but the additional natural vinaigrette ensures that the trapped wasp are seduced very quickly and fall into the fluid, hereby offering a fast kill.

The wasp fluid is developed on a non-chemical and environmental friendly basis and is absolutely harmless to humans and animals.

(*) The wasp fluid is not included in the scope of supply

Key markets:

- Household use
- Terraces
- Beach areas
- Hotel areas
- Swimming pools
- Amusement parks
- Shopping areas
- Zoo's
- Stable yards

Key features:

The wasp trap has been designed to offer durability and ease of use, combined with a realistic price for both end users as well as industrial users.

Specifications:

Name	: W-trap, the effective wasp trap
Material	: transparent yellow PP plastic, removable lid
Attraction medium ^(*)	: Wasp trap fluid 250 ml (optionally available)
Mounting position	: Free standing or hanging (rope not included)
Article number	: 2.10.1100
Product dimensions	: 19 x 13cm (Diameter x H)
Dimensions pallet	: 120 x 80 x 225cm (L x W x H)
Guarantee	: 1 year on damage during int transport.
CE-approval	: yes
Box dimensions master carton	: 40 x 60 x 70cm (L x W x H)
Amount per master carton	: 56 pcs
Weight master carton	: 12 kg
Amount per pallet	: 672 pcs (12 master cartons)
Weight Pallet	: 164 kg
